Open Source World

<http://mitu.co.in>

Existence of open source

- There is a vast increase in adoption of open source software solutions across the private enterprise, government associations and organizations, industries.
- In last several years, we have seen enterprise customers are wishing to implement open source software development, thus forming a great base for software professionals, who are expertise in Open Source, to start a wonderful career, with lots of opportunities.

Mitu Skillologies

- In order to provide the training on open source software, the “**mITu Skillologies**” was founded five years ago at Nashik city of Maharashtra.
- As FOSS that is, Free and Open Source Softwares are Free, License-less, Secure and Fast, the popularity of them is increasing with great speed.
- The purpose of this initiative is to provide a platform where we want to take the open source to the professionals who want to aspire a career as a leader in the IT industry.

Mission

- To develop the community in open source software development by training students with advanced open source technology with practical and creative teaching.

Why Mitu Skillologies?

- We have an experienced and dedicated team of trainers, resource persons, developers, instructors, and open source evangelists.
- We are working with the most renowned technologies used in IT industries which support the growth of companies.
- We strongly believe in constructive education.
- In order to empower, we provide opportunities for learners to transform their lives through innovative learning and practical training.

How Mitu Skillologies work?

- We built our platform of success through wonderful workshops, practical training sessions and creative classroom training, where students become literate with freely available open source Information Technology.
- We conduct the workshops, training sessions and certification courses in the technical institutes as per the requirements.
- Till date, we have conducted college workshops and Faculty Development Programs on several open source technologies primarily based on GNU Linux operating system.
